Nufarm Announces New Grapple Herbicide

Morisville, NC – [Nufarm Americas, Inc.](#) announced today the introduction of a new herbicide, Grapple™. With the active ingredient rimsulfuron, Grapple offers outstanding broad-spectrum pre- and post-emergent weed control on a wide range of crops, specifically in vineyards and orchards.

“The addition of Grapple allows us to provide a more complete weed control program, particularly in combination with Tuscany® SC,” says Alan Haack, Ph.D., Nufarm’s technical services manager for Western U.S. “This marks an improved offering for our customers who grow tree fruit, tree nuts, grapes and citrus crops.”

Grapple delivers lasting performance on pre- and post-emergent troublesome weeds including barnyard grass, redroot and smooth pigweed, puncturevine and common purslane.

Offering tank-mix compatibility with a wide range of pre-emergent herbicides for added weed control options, Grapple provides long-lasting residual control to keep floors clean.

For more information on Grapple and a complete list of Nufarm crop protection products, visit www.nufarm.com/us.
